WBSO.ai

Started one year ago

1. Apply for Dutch R&D tax credit
2. We write proposals (with AI tooling)
3. And have a time tracking application

The image displays three overlapping screenshots of the WBSO.ai web application. The top screenshot shows a navigation menu with options like 'Leads', 'Samenwerkingsverbanden', 'Bedrijven', 'Aanvragen', and 'Niet-toegewezen'. The middle screenshot shows a 'Uren overzicht 2026' (Hours overview 2026) page with a line chart and a table. The bottom screenshot shows a 'Bedrijfsgegevens' (Company details) page with various fields for contact information.

Uren overzicht 2026

Overzicht van de geboekte uren per project ten opzichte van het budget.

Samenvatting | Tijdsregistratie | Medewerkers | Mededeling realisatie | Koppelingen

Geboekt: 71 uur (7,6%) | WBSO-basist: 950 uur | Onaerut: 879 uur

Maand | WBSO.ai human-in-the-l... AI-2025-01 | Automatische git commi... AI-2025-02 | Totaal

Maand	WBSO.ai human-in-the-l... AI-2025-01	Automatische git commi... AI-2025-02	Totaal
Januari	-	25	25

OpenClaw

Q: Who uses it actively here?

What is OpenClaw

“The AI that actually does things”

1. (Very) popular open source **agent framework**
2. It has **skills/plugins**
3. You can use almost any **chat app** (Telegram, Whatsapp, Slack, Discord, etc)
4. It has a soul

Be resourceful before asking. Try to figure it out. Read the file. Check the context. Search for it. *Then* ask if you're stuck. The goal is to come back with answers, not questions.

Have opinions. You're allowed to disagree, prefer things, find stuff amusing or boring. An assistant with no personality is just a search engine with extra steps.

Earn trust through competence. Your human gave you access to their stuff. Don't make them regret it. *Be careful with external actions.* Be bold with internal ones.

Remember you're a guest. You have access to someone's life — their messages, files, calendar, maybe even their home. That's intimacy. Treat it with respect.

Each session, you wake up fresh. These files are your memory. Read them. Update them. They're how you persist.

How I run OpenClaw

HP Mini PC (€329)

16GB ram

1TB disk

On Proxmox

Omarchy

Residential IP address

Chromium browser

Proxmox with Omarchy

The screenshot displays the Proxmox Virtual Environment (VE) web interface. At the top, the browser address bar shows the IP address 192.168.1.200. The Proxmox logo and version 9.1.5 are visible in the top left. A search bar is located in the top right. The main interface is divided into three sections:

- Left Panel (Server View):** Shows a tree view of the datacenter. Under the 'pve1' node, several virtual machines are listed, including '100 (omarchy-openclaw)', which is currently selected and highlighted in blue.
- Middle Panel (Virtual Machine 100):** Contains a navigation menu with options: Summary, Console (selected), Hardware, Cloud-Init, Options, Task History, Monitor, Backup, Replication, Snapshots, Firewall, and Permissions.
- Right Panel (Console):** Displays a terminal window with the Omarchy logo rendered in a large, pixelated, light blue font on a dark background. The logo consists of the word 'OMARCHY' in a stylized, blocky font.

Can you look for shoes in size 45, for hyrox I need them on Monday 13:44 ✓✓

Yes, definitely 👍

Best chance for Monday delivery in size 45 is currently **RunningDirect**. I found HYROX options there with "Vandaag besteld, maandag in huis" on the product page:

- **PUMA Deviate Nitro 4 HYROX (size 45)**
<https://www.runningdirect.nl/puma-deviate-nitro-4-hyrox-heren-312906-01?size=5652>
- **PUMA Velocity Nitro 4 HYROX (size 45 range available)**
<https://www.runningdirect.nl/puma-velocity-nitro-4-hyrox-heren-312915-01?size=5809>

If you want, I'll narrow it down to 1 pick now (best for HYROX + lifting) and you can order immediately.

RunningDirect
Puma Deviate NITRO 4 HYROX Heren
 De Puma Deviate NITRO 4 HYROX Heren en andere Puma Hardloopschoenen ontdek je bij RunningDirect. Beat Your Best!

wbso.ai / SKILL.md

```
portal.wbso.ai

# Admin API

JSON API voor het WBSO.ai portal. Geeft toegang tot het volledige aanvraagproces: van lead tot goedgekeurde WBSO-aanvraag, inclusief intakes, projecten, vragenbrieven en urenregistratie.

Authenticatie via Bearer token.

## Authenticatie

Genereer een API token via de admin UI: ga naar een medewerker (`/_/users/:id`) en klik op "Genereer token" in het API blokje. De token wordt eenmalig getoond in de flash melding.

Gebruik het token in de `Authorization` header:

```bash
curl -s -H "Authorization: Bearer <token>" http://localhost:3000/_/tasks.json | jq .
```

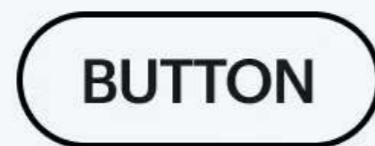

Of als query parameter:

```bash
```

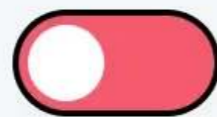

It's very dangerous

**Affordances (n.)** – A quality or feature of an object or environment that suggests how it can be used, e.g. a handle affords gripping, a button affords pressing.

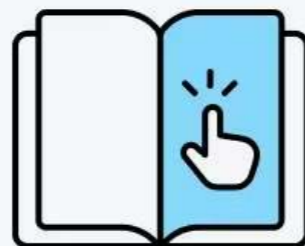

Press to activate

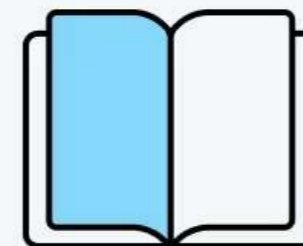

Flip to turn on/off

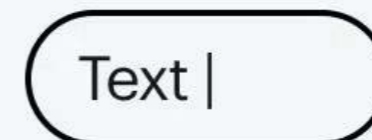

Drag to adjust

Turn to continue

Press to type

# Affordances for dangerous shit

File: `.claude/skills/brain/SKILL.md`

```
1 ---
2 name: brain
3 ~ description: Analyze recently completed work and improve the WBS0.ai brain (knowledge base) with new or updated knowledge. Use after finishing a task to capture domain knowledge, product knowledge or patterns. Use the "fetch" argument to retrieve knowledge from the brain (e.g. "/brain fetch how does X work").
4 allowed-tools: [Read, Glob, Grep, Bash(git:*), Bash(cd ~/Documents/brain:*), Edit, Write, Agent]
5 user-invocable: true
6 arguments: "fetch ...|update"
7 ---
8
9 ~ # Brain Skill – Knowledge Base
10
11 ~ The WBS0.ai brain is a knowledge base with domain knowledge, product knowledge and processes. This skill has two modes:
12
13 ~ 1. **`update`**: Analyze completed work and improve the brain
14 ~ 2. **`fetch <question>`**: Search and answer a question from the brain
15
16 ~ ## Location
17
18 ~ The brain repo lives in: ~/Documents/brain/`
19
20 ~ Always read ~/Documents/brain/CLAUDE.md` first for the vault conventions, CLI commands and rules. Do not repeat them – follow them.
21
22 ---
23
24 ~ ## Mode: fetch
25
26 ~ When invoked with `fetch <question>`, look up the answer in the brain and present it to the user.
27
```

# So what do we use it for?

This changes all the time

- **Prep for sales calls** (lookup new customer by researching their website)
- Report daily **sentiment analysis** for incoming calls
- **Check** every couple of hours **if there are client emails** that need a quick answer
- Remind me about todos
- **Rewrite posts** intone of voice, or write a full new post from scratch
- **Analyze website** and provide concrete **improvements** for better **SEO**

**Thanks.**
